### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a circuit to reduce erroneous activation of the display elements in a dot matrix display. Each independent claim identifies the uniquely distinct feature "a discharge circuit for coupling each of the scan lines to the voltage used to drive the display elements at a time when none of the signal lines is activating the display elements, whereby charge accumulating at the display elements is discharged to reduce erroneous activation of the display elements". The closest art, Shigeo, as discussed in the last Office Action dated 6/22/2004, disclosing a discharge circuit for coupling each of the scan lines only to the reduced voltage source at a time when none of the signal lines is activating the display elements, either singularly or in combination with other prior art in record, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
